KINHAR ENERGY / BUYER RESOURCE

AC EV Charger Sample Configuration & Document Review

Use one record per Mode 2 portable or Mode 3 wall-mounted configuration. Link the agreed quotation, exact sample and available documents before the next purchasing decision.

Scope: identity and document review only, not a test report, certification or approval for operation. Record unknowns as pending. Do not energise, open or modify equipment to complete this sheet.

01 Identify this sample

Buyer / project reference

Review date / reviewer

Destination market / intended application

Quotation / specification reference and revision

Buyer-facing model / supplier model mapping

Sample ID / serial or batch / received date

Hardware / firmware revision, if documented

Nameplate / sample photograph references

02 Compare agreed and received configuration

Copy stated ratings from the agreed reference and sample labels or documents. Similar housings or headline kW values do not establish the same configuration.

Item	Agreed reference	Sample record / difference
Supply and ratings Voltage, phase, current, stated output		
Connections Vehicle and supply-side separately		
Cable and supplied items Length and agreed item-list reference		
Ordered functions Only features included in this quote		
Branding / documents Nameplate, manual, packaging revisions		

Supplier statements are not verified test results. Optional functions are not automatically included. Keep any performance evaluation in a separate qualified record.

Filling: use a PDF reader with form support, then Save As to retain your copy. This file has no submission action or scripts and does not send your entries to KinHar.

Documents, open points & next review

Repeat sample ID / project reference

03 Link each document to this configuration

Record the identifier, responsible entity and applicable model/revision. A reference standard, certificate, declaration and test report are different records; match scope to this sample.

Document	Identifier / entity / model scope	Review note / status
Datasheet and manual		Pending
Destination documents As requested for this order		Pending
Item list and artwork		Pending
Separate evaluation record Provider, date and sample scope		Pending

If OCPP is ordered, record version, firmware, intended CSMS and separate interoperability evidence. A feature option is not OCPP certification. Verify any claimed certificate and its product/software scope with OCA.

OCPP / CSMS reference, only if in scope

04 Close questions before the next purchasing decision

Open item / evidence needed / responsible party / target date

Record status

Incomplete - keep open

Next review date / record revision

No operational release: "Document review complete" describes this record only. It does not approve safety, performance, installation, market access or production. Agree further assessment and change control separately.
